13. The processes and methods used to recycle or reuse the covered electronic devices received from consumers: MPC utilizes a manual dismantling process to return materials to the commodity state. MPC also utilized shredding technology for precious metal or energy recovery; materials are shredded after the removal of certain problematic materials (batteries, mercury relays, etc.). MPC processes CRT glass according to state and federal guidelines through a separation and cleaning process. Commodities, including glass cullet, are sent back into their prospective markets to be reused. Materials identified in the sorting process that pass functionality testing are sold for reuse in bulk or via our retail outlets. All functional tested items that have the capability to maintain confidential customer data are handled according to MPC's data security policies and procedures.
